[CONTACT US](#)

One App.

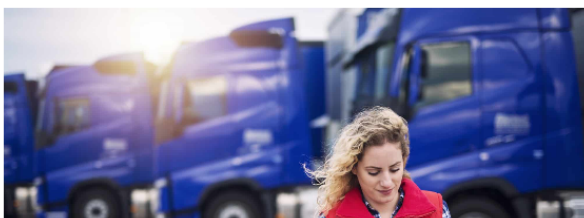

Simplify your drivers' lives by putting everything they need in one unified mobile driver app. A single app means one login to remember, one app to install, one app to learn, and no redundant data entry.

[LEARN MORE](#)

Real-time.

Your drivers can now enjoy the feeling of being directly connected to your dispatch system with real-time workflow, eliminating the awkward transmission delays that frustrate drivers and slow down the pace of your business.

Trusted by Industry Leaders

Unify powered by Eleos & Geotab

Unify powered by Eleos and Geotab, combines an open fleet management system, comprehensive driver workflow platform and FMCSA compliant ELD into a complete solution for your fleet. Everything you need in one simple package.

[LEARN MORE](#)

Eleos helps trucking fleets:

- Maximize driver, truck, and trailer utilization
- Increase the profitability of your network
- Improve compliance with shipper demands
- Increase service quality
- Reduce fuel cost
- Eliminate crippling communication outages

Maximizing Driver Productivity

More drive time. Fewer mistakes. A feeling of confidence. Truck drivers who use Eleos-powered mobile apps boost their productivity with a mobile app that unifies and organizes all of their workday information into a single app.

[REQUEST A DEMO](#) [LEARN ABOUT OUR PLATFORM](#)

More Drive Time

Truck drivers move faster when they use Eleos-powered mobile apps. They quickly execute and document their work with fewer phone calls (with less time on hold) and less data entry. This frees up time for more driving and more revenue.

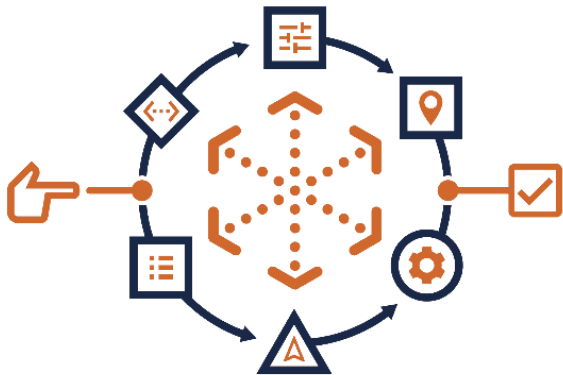

[REQUEST A DEMO](#)

Eliminating Costly Mistakes

Eleos helps truck drivers avoid profit-killing mistakes. Our mobile apps help ensure that the driver arrives in well-maintained equipment at the right place, via a safe, legal route, at the right time, using the best-priced fuel. No more chasing drivers for status reports, missing documents, signatures, or compliance issues.

[LEARN MORE](#)

Moving with Confidence

Eleos' best-in-class workflow capabilities guide drivers throughout their workday. Much more than mere "circle of service", our workflows can be crafted to perfectly match the customer requirements and the fleet's operational needs. Truck drivers do their work quickly, with the confidence that the prompts in their mobile app are timely and comprehensive.

Platform Features

- Workflow
- HOS/ELD
- Telematics/Fleet Management
- Voice-guided turn-by-turn navigation with trucking attributes
- Bi-directional messaging with form/macro support
- Equipment locator
- Offline operation
- Integrated weather
- Location maps
- Intelligent locking to prevent distracted driving
- Site/job rating screens
- High-quality document scanning and processing dynamic forms
- Dashboards
- Video library management
- Video view-tracking and reporting
- Text & video news feeds
- Payroll
- Task lists
- Menu builder
- Exception reporting screens
- Data gathering tools
- ...and much more!

About Eleos

We are an engineering-heavy, product-centric SaaS company. We are changing the universe of driver-facing transportation technology. We wish to be known for our innovation, reliability, and for our table tennis prowess.

Eleos was founded in 2011 by Kevin Survance and Ryan Crum. Kevin and Ryan have prior experience developing software at MapQuest (where Kevin served as CTO), American Express, Microsoft, and Walmart Labs.

Eleos is more than just technology and code. We are people who work toward the common goal of making truck drivers' lives better. Our team lives and works all across the United States. While we aren't coding and building apps, we love cooking great food, learning new things, serving others, and playing fierce matches of table tennis.

Why Eleos is Different

Focused on open, programmable products.

Not content to create products that are merely configurable, Eleos has a bias for open products that can be easily programmed by our clients to match their unique business requirements.

Deep experience developing mobile driver apps.

It is doubtful that any company has built more custom mobile apps for truck drivers than Eleos. Our platform is the embodiment of that experience - the knowledge of not just the correct solution, but the 1,000 possible solutions that did NOT work.

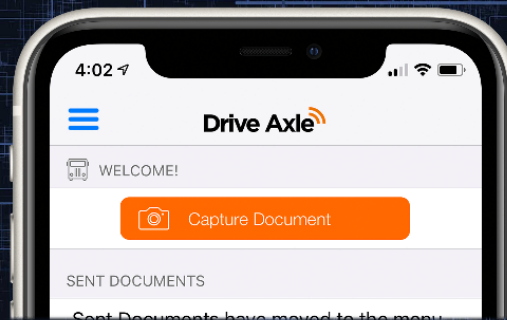

Promises, performance, and reliability.

Although we're both human and imperfect, we strive to keep our promises at all cost, deliver product of exceptional quality, and maintain outstanding system performance and uptime.

Learn about our driver app - Drive Axle

In addition to our platform, we offer another product made specifically for drivers. Drive Axle is the best smartphone solution for scanning, sending, and storing freight documents.

```

Using the Eleos web APIs, you can create a custom mobile driver app without writing a single line of mobile code. Dozens of Eleos-powered driver apps have been successfully launched by major trucking fleets, TMS providers, telematics vendors, and technical consulting firms.

Leveraging pre-built Eleos components, you can rapidly create an app that will delight drivers and boost productivity. After your app is launched, you'll maintain complete, run-time control of its powerful features.

How It Works

Create custom mobile apps for drivers using visual tools and small amounts of server-side code.

Eliminate the cost and risk that comes with building mobile apps from scratch. Move 20X faster leveraging our pre-built native components.

Flip through these slides for a step-by-step overview of the process.

● ○ ○ ○ ○ ○

API Resources

Integration Web Services Documentation

Rather than building a mobile app from scratch, your team can implement just a few HTTP web services to authenticate users, retrieve data, process messages, and customize the app experience based on your own systems and databases.

[API DOCUMENTATION](#)

Platform Dashboard and App Editor

Use the Dashboard to get at-a-glance insights about your app's adoption, usage, and health. Build and update what your users' experience with point-and-click editors for menus, activity screens, forms, and more.

[PLATFORM DASHBOARD](#)

Platform API Documentation

Use our REST API to send messages and notifications to your drivers, manage app content, and more.
