

# Avanti VirtualCapture™ Interactive As-Built Data Documentation **FORWARD FASTER**

## VIRTUAL 360° DESIGN DOCUMENTATION

At Avanti, we employ leading-edge AEC (architectural, engineering, construction) technology to bring speed and unparalleled accuracy to data documentation through our **VirtualCapture™ Services**. Empowered by our investment in this technology, our Design Studio teams have unique in-house capabilities to prepare fully interactive as-built designs for you in days, not weeks. Together, we can create preliminary virtual designs and schematics, conduct site surveys, and produce precise point cloud and as-built plans to help you visualize your project and review changes – all without leaving your office. With accuracy to the millimeter, **Avanti VirtualCapture Services** enable you to cost-effectively review considered changes and to keep your projects ahead of schedule – helping move your business **FORWARD FASTER**.

### FOR ARCHITECTS

**VirtualCapture™** means faster collaboration and more efficient coordination among all stakeholders. The pinpoint accuracy of the measurements is especially helpful in working around the detail needs of columns, doorways, windows, and walls. Plans are produced in both AutoCAD and Revit, to suit your firm's needs. From scan to plan in a fraction of the time.

### FOR CONTRACTORS

Our **VirtualCapture™ Services** means nearly-immediate access to precise project plans and measurements – helping reduce delays caused by not having accurate, verified as-built measurements. Particularly well-suited for historical, urban and municipal projects, **VirtualCapture™** supports both new-build and renovation projects, and enables multiple scans to be overlaid, for easier shared review.

### FOR PROJECT MANAGERS

The value of our **VirtualCapture™** design plans is best realized with our **WebShare** services – an interface for us to interactively review plans and change orders together and consider potential adjustments. This will help reduce or eliminate trips to site and potential delays and errors in the relay of jobsite conditions, ultimately keeping your project on-schedule.

## The Avanti Restaurant Solutions Team

### LEADERSHIP TO HELP MOVE YOUR BUSINESS FORWARD FASTER

**Mark Rossi**  
CEO/FOUNDER

Avanti's founder and leader – helping restaurant owners and operators grow their businesses with kitchen solutions since 2003.

**Gary Coburn**  
COO

40-year hospitality industry veteran and visionary, from owner/operator and creator of concepts to VP of National Accounts and Design-Build.

**Matt Ratzlaff, LEED AP**  
DIRECTOR OF CONTRACT OPERATIONS

Design Build lead for Avanti, joining from having been a principal in a design firm, leading operations and construction management.

**Trey Hoang**  
DIRECTOR OF DESIGN

12 years with Avanti, designing kitchen workflows that marry thoughtfully to beautiful interiors to enhance the client's brand and customer experience.

**John Archuleta**  
VIRTUAL DESIGN TECHNICIAN

Passionate about technology, with 5 years in the restaurant and equipment industry, creating forward-looking solutions.
