## Social

Thank you for your interest in our work.

**Market research** is an organized effort to gather information about target markets or customers. It is a very important component of business strategy.

Our job at Hivemind, is to match people with projects. Companies you know are constantly looking to improve their offerings; making our lives easier and the things we use better.

And, we need your help with that.

Here at Hivemind we are always looking for a diverse group of people to participate in our research projects. Our database is built to find people who are not just looking to take surveys, but who want to participate in the change each company is looking for!

We ask that our participants bring their creativity and consumer experiences to truly help shape the brands we know and love today.

We are taking a new approach to bring you information on our projects.

Aside from our social media sites, you can now check this website for the latest survey links to all of our live projects. Just click on the Current Projects page to see if you qualify to participate.

You can contact us at [info@hivemind.zone](mailto:info@hivemind.zone) or click the link below to register with us.
