Product Description

The Ultimate Electric Lock Pick Gun

After Bosnian Bill made a video reviewing Multipick's KRONOS EPG very positively, demand for this vibrating, lock-opening tool went wild. This is the latest, best-selling version and most talked about EPG ever!

I've used all of the available EPGs on the market and the Multipick KRONOS is by far the most effective. This beautiful, almost silent lock picking machine is a pleasure to own and use. It eats locks for dinner. This tool is a weapon in the war on locks!

Designed, engineered and manufactured in Germany for exquisite professional performance. And absolute dream to use, a **pure lock-opening machine**.
