Experimental models

## Production models

Production models are recommended for use. They have been tested across multiple domains and trained on hundreds of thousands of comments tagged by thousands of human moderators.

Have questions and need help?  
Visit [Perspective API support](#) to get answers.

## About

Perspective was created by Jigsaw and Google's Counter Abuse Technology team in a collaborative research project called Conversation-AI. We open source experiments, models, and research data to explore the strengths and weaknesses of ML as a tool for online discussion.
