## Overview

Perspective is an API that makes it easier to host better conversations. The following concepts will help you understand how the API uses machine learning models to score the perceived impact a comment might have on a conversation. The API is hosted on Google Cloud Platform, which means you can use it with any popular programming language.

To access the API, review the [Get Started](#) [documentation](#).

OUTPUT: SCORE	
Toxicity	0.99
Severe_Toxicity	0.75
Insult	1.0
Sexually_Explicit	0.04
Profanity	0.93
Likely_To_Reject	0.99
Threat	0.15
Identity_Attack	0.03
