 **Which businesses must have compliant websites?**

Since the recent DOJ affirmation all business-related websites are now considered places of public accommodations and must be accessible for people with disabilities.

MITIGATE THE RISK OF LEGAL ACTION

Web accessibility lawsuits rise exponentially

The exponential growth in web accessibility lawsuits has a widespread effect across most industries, with small and medium businesses right in the center of the storm.

Lawsuit numbers are estimated to continue to increase as the need to enable accessible digital experiences becomes more prominent.

HOW DOES IT WORK?

Test your site, learn exactly where you stand

Learn the compliance level of your website instantly, get a report of all deficiencies.

Enter your domain

Test any domain you want, anywhere on the web.

Get a detailed & accurate audit

Including elaborate explanations and a score for each test.

Download the audit

The report is yours to share with your team or peers.

The screenshot shows the ace accessibility audit interface. At the top, it displays the ace logo and a 'Download Audit' button. Below that, the URL 'https://myshop' is shown. A large green checkmark icon is followed by the text 'Compliant! Great work, you are compliant with the WCAG 2.1 level AA.' A small note indicates 'accessiBe is detected on the website'. The report is categorized into sections: 'Clickables' with a score of 100, listing four items with green checkmarks: 'Elements with button functionality should be tagged for assistive technology', 'Buttons cannot be empty', 'Links cannot be empty', and 'Links that open in new tabs/windows should be tagged for assistive technology'. The 'Titles' section also has a score of 100 and lists three items with green checkmarks: 'Every page should include a single H1 title', 'Titles cannot be empty', and 'Titles should have a consistent hierarchy'. The background of the screenshot shows a product page for 'YSHOP' featuring 'women's shoes' and a 'NIKE AIR MAX 90 LX' for '\$85 USD'. The product page includes a size selector set to '7' and an 'ADD TO CART' button.

WHY YOU SHOULD USE ACE

aCe is the industry standard for accessibility testing

It's free and always will be

aCe is a community service to help drive a more accessible web

Compliance Overview How Does It Work? Why aCe? FAQs

Frequently asked questions

How do I become compliant?

In order for your website to be compliant, you will need to follow and implement WCAG (Web Content Accessibility Guidelines) 2.1 level AA requirements.

Why isn't my website compliant?

Web accessibility is very complex. Therefore, most platforms cannot incorporate the requirements by default. If your website didn't go through a remediation process, it most likely isn't compliant.

Can I settle my lawsuit with the aCe report?

aCe has no legal authority, but it does provide your compliance status as of testing date, which can help you and your team decide on a course of action.

Does aCe collect data from my website?

aCe does not collect data from your website and it is compliant with data privacy regulations such as GDPR and CCPA.

What do I do with the results?

aCe breaks down all WCAG requirements and highlights how your site adheres to them, the report can be used by developers or by accessibility solutions to fully remediate your site.

How accurate is aCe?

aCe uses accessible's AI engines and API to evaluate your website to deliver results as accurate as manual accessibility testing.

Why is aCe more reliable than other testing tools?

While most tools are only able to flag some errors (inaccurately) based on presets, by utilizing accessible's AI, aCe is able to determine compliance status similarly to how a human would have.

Can aCe make my website compliant?

aCe is an accessibility auditing tool, not a remediation one. aCe is specifically designed to give you an accurate audit of your compliance status.

Can aCe tell me if I comply with legislation such as ADA and 508?

aCe detects compliance according to the WCAG which is widely adopted by legislation around the world, ADA, AODA, EEA, IS5568 and others.
