

Frequently Asked Questions from SMB Clients about MyHRConcierge

What is the difference between MyHRConcierge and other HR Companies?

HR is about people. That's why delivering personal service to our clients is the heart and soul of our business.

"We chose MyHRConcierge because of their knowledge, experience, cost efficient solutions and tangible availability – they are there for us on a personal level even more than I dreamed or planned."

— MyHRConcierge Client

Many HR services are built around systems the client uses to research labor compliance rules for themselves. Then, it's on the Client to figure out how to apply that information. Most SMB Clients don't have the time or resources for this.

Here's how the MyHRConcierge approach is different. The employer's specific situation and needs drive how we deliver the service. We use systems to make things easier on SMBs instead of adding to their workload.
