ACCESS™

The National Sheriffs' Association (NSA) through an innovative partnership with BI² Technologies is implementing a new certified

No Up-front Costs

BI² Technologies will provide a complete background check system. This includes the hardware, software, training, and on-going service and maintenance to conduct the type of background check services your citizens need.

Revenue Generating

The Sheriff's Office will receive 25 percent of the net revenue from every background check until the system is paid for. After that, the Sheriffs' Office will receive 30 percent of the net revenue on every background check conducted.

Comprehensive Background

The service covers a national criminal background check, national sex offender background check, terrorist watchlist, and much more.

Convenient and Trusted

Citizens are able to get a certified background check from a place they trust - the Sheriff's Office.

The NSA also negotiated, as part of its agreement, that BI² Technologies will also provide any participating Sheriff – again, at no upfront cost to the Sheriff or county – with the NSA endorsed and cutting-edge Inmate Recognition and Identification System, I.R.I.S.™.

I.R.I.S.™ technology uses the human iris (the colored part around the pupil) to accurately identify a person. I.R.I.S.™ is far more accurate than a fingerprint and results are provided within seconds. Sheriffs across the country are using this remarkable technology to better protect the public and their staffs. You know for sure who you have. And no Sheriff ever wants his staff to release the wrong person.
