Pacific Clinics' Recovery Education Institute (REI) helps persons with lived experience of mental illness (which can also include family members) pursue a degree in the mental health field. REI assists students in reaching their personal educational goals at NO COST to eligible students. Classes prepare students to enter certification programs, vocational programs, and/or college settings. At REI, students develop the personal and academic skills necessary to succeed with their education.

As a contractor with the Orange County Health Care Agency, REI offers: (1) workshop courses; (2) prevocational courses; (3) college-credit courses; (4) extended education courses; and (5) student advisement. College credit courses are provided by Santiago Canyon College and Saddleback College.

For more information, contact the program by e-mail at OCREI@pacificclinics.org or by phone at (714) 244-4322.
