Description

Natural Moisturizing Cream, Coconut Scented, from UNIQUE E®

This Natural Moisturizing Cream helps soothe tired skin, moisturize aged dermal layer and reduce the appearance of fine lines and wrinkles. Pure. Natural Ingredients. Moisturizes and rejuvenates.

UNIQUE E® Natural Moisturizing Cream— Formulated using ALL-NATURAL ingredients including our Mixed Tocopherols, Tocotrienols and Vitamins A & D. This unique, novel formulation combines excellent skin moisturizing with strong anti-aging and wellness benefits.

UNIQUE E[®] Natural Moisturizing Cream was formulated for enhanced skin penetration and extended time-release provides lasting moisturizing effects, keeping the skin soft, supple, and smooth feeling all day. Its skin-nourishing properties are intensive enough for use as a night cream, while its texture is light enough for use during the day and under makeup.

Vitamin E as natural, unesterified tocopherols plus tocotrienols provides strong antioxidant protection, and its combination with vitamins A and D3 supports healthy skin. The highly moisturizing, fast-absorbing, and non-greasy base formula provides a subtle, fresh shine and helps your skin look and feel beautiful and healthy. Its rich, creamy base formulation contains high amounts of shea & cocoa butters which support soft and smooth skin with an elegant feel.*

Easily apply make-up over this elegant moisturizing cream with no worry of smearing, dripping or sagging.

Natural Moisturizing Cream Key Ingredients:

- **Vitamin E as natural, unesterified tocopherols plus tocotrienols** – most vitamin E supplements contain only alpha tocopherol because it was thought that only this one was important. Even worse, most vitamin E skin products contain only a small amount of synthetic dl-alpha-tocopheryl acetate. This means that they contain only one of the eight members of the vitamin E family in the less effective synthetic form. They do not contain gamma tocopherol and tocotrienols. ***In addition, its active group is blocked and cannot fight the free radicals on the surface of the skin.*** Even after penetration of the skin only a very small amount becomes active. It is for this reason that many vitamin E skin products have been ineffective in clinical testing. Only products which supply the complete vitamin E family and are particularly rich in gamma tocopherol and tocotrienols in their natural unesterified form, provide the full skin health and anti-aging benefits. ***UNIQUE E[®] Natural Moisturizing Cream is formulated with high levels (likely the highest of any skin product) of a unique complete vitamin E formulation, particularly rich in gamma tocopherol and tocotrienols in their natural unesterified form for full benefits.***
- **Vitamins A and D3** – vitamin A in the bio-active form of the retinol supplies 3,300 IU per gram. Vitamin D3, as the highly bio-active cholecalciferol supplies 1,000 IU per gram. Strong research supports their skin health management benefits.
- **Shea & Cocoa Butter** – rich natural emollients that protect the skin and provide intense moisturization.
- **Ethyl Macadamiate** – natural emollient that provides great slip with a silky dry and elegant skin feel.
- **Grape seed Oil** – highly moisturizing natural emollient that enhances penetration in the skin and supports hydrated and supple skin with a light silky feel.

Natural Moisturizing Cream, Paraben-free, All-Natural Pampering for Your Skin

We use all-natural corn-derived Zea Mays instead of parabens or glycerin to naturally preserve our cream. Guaranteed NO harsh chemicals, sulfates, parabens, dyes, phthalates, or petrochemicals (no petrolatum, mineral oil, or paraffin). Now you can nourish your skin both inside and out when you pair our Vitamin E dietary supplements with the UNIQUE E[®] Natural Moisturizing Cream. Receive the same Vitamin E health benefits by applying directly to your skin! Pure High-Gamma Vitamin E is a powerful antioxidant that assists the body's natural ongoing cellular rejuvenation for protecting and maintaining the health of your skin. Tocotrienols are known for assisting with cellular protection both internally and on the dermal layers. Key Moisturizing and Anti-Aging Benefits of UNIQUE E[®] Natural Moisturizing Cream:

1. **Skin moisturizing benefits**
 - Provides emollient skin-softening effects*
 - Enhances moisture retention*
 - Promotes dermal elasticity*
 - Provides superior oxygenation*
2. **Anti-aging benefits**
 - Provides strong antioxidant protection*
 - Helps delay biological skin aging*

The Science Behind the Product

Our research and development team formulated UNIQUE E[®] Natural Moisturizing Cream for enhanced skin penetration and extended time release for lasting effects. Research showed conclusively that the natural tocopherols and tocotrienols penetrate the skin faster than the esterified form used in most products. The formulation with grape seed oil, shea and cocoa butter, ethyl macadamiate and others enhances the skin penetration and supports extended action.
