[ships in 2-3 days](#)

I have successfully measured myself in accordance to the specifications of this product listed below in the "How to Measure" section of the product description:

Add to Cart

Fully Involved Leatherworks Handmade Leather Firefighting Radio Strap are made with strong and durable leather that still has a supple feel. Our products are made to last, and will ride with you through many years, if not your entire firefighter career.

PLEASE MEASURE YOURSELF BEFORE ORDERING. OUR SIZES DIFFER FROM ANY OTHER COMPANY. REPAIRS CAN NOT BE MADE.

Sizing-

- Extra Small (53-60 inches) from bottom of strap excluding case
- Small (58-65 inches) from bottom of strap excluding case
- Medium (64-71 inches) from bottom of strap excluding case
- Large (70-77 inches) from bottom of strap excluding case

If ordering as a gift here are some recommendations for size, however, not always 100% correct.

- Extra Small 5'8" or less than 150 lbs
- Small - under 5'10" or less than 200 lbs.
- Medium - under 6'3" or less than 260 lbs.
- Large - over 6'3" or more than 325 lbs.

How to Measure-

Take a piece of webbing, rope, or string over your shoulder. Bring two ends together at your hip where you want the strap to attach to the radio holster. Take a tape measure record the total length in inches and choose your radio strap size according to the standard lengths. Be sure to stand straight when measuring for best fit.

Product Description-

- Red Stitched edges
- Top quality Nickel scissor buckles to attach to a radio case
- 1 belt end keeper
- 2 horizontal mic clips
- 1 Mic clip with cord keeper included
- Anti-sway strap (matching hardware)

Our Universal Radio case may be added with matching hardware and leather. It fits 99% of current radios on the market including but not limited to: Motorola APX series, Motorola HT series, Motorola CP series, Motorola DTR, EF Johnson, ICOM, VERTEX, Viking Radios, King Radios, and many more.

All of our products are handmade 9+ oz. saddle grade American leather, well above industry standard. Our heavy duty nickel hardware will stand the test of time. All of our products are made from American Zebu hides. These hides are brought to our shop and then hand cut. Each piece of leather for our straps are hand dyed using Oil Dye. This Oil dye not only will not come off, but helps ensure that your product will not crack, fades, or loose color over time. Our Stitched Edge will give each product a classy look, while still maintaining the durability of one piece of leather.

NEVER DO WE RECOMMEND WEARING YOUR RADIO STRAP OVER YOUR TURNOUT COAT. THIS CREATES AN ENTANGLEMENT HAZARD AND IS HARSH ON YOUR RADIO AND STRAP. For proper use with turnout gear place your coat over the strap with your radio hanging over bunker pants. Your strap should be placed where your coat will shed water off of your radio, but yet you can still use knob functions. Pull the collar mic out of your coat through the neck. By doing this you will protect your strap and most importantly your communication device.

ABOUT US

Firefighter owned and operated, we have been in business since 2013 and produced over 30,000 radio straps, chin straps, glove straps and other pieces. While we may not have been on the block the longest, what has made our business is our attention to detail, quality products, and customer service. Can you find anyone else out there that will back their radio cases for life?
