

Product Installation Requirements

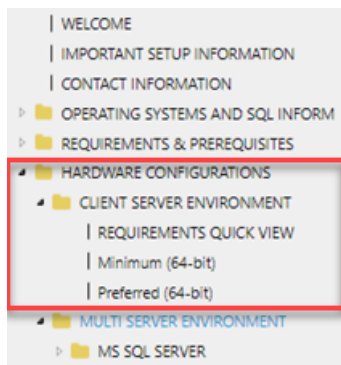

Version 12, October 7, 2020

Welcome to the Window Book Product Installation Requirements guide.

Window Book strongly recommends a dedicated server for Window Book products.

This guide provides the installation requirements for installing Window Book software, including hardware and software requirements, other requirements such as necessary permissions, and recommended guidelines. In addition, it also provides guidelines when it comes to system maintenance and FAQs.

Browse through the Guide's pages by clicking on the icons below or selecting pages in the table of contents to the left (items that include an image of a file folder are expandable and contain an additional sub-section(s)). Example:

There is no one size fits all scenario pertaining to the requirements for installing Window Book software. Much of it is depends on what Window Book software is being installed and the Mailer's job volume and/or size. Therefore, this guide provides requirements information and guidelines for minimum and preferred configurations, taking into account server/stand-alone installations and workstation installations. In addition, if the requirements for a specific Window Book product differ slightly then the general guidelines, information for it is provided as well.

To quickly find specific product information, enter search criteria in the search box above and click the search button.
