Software Updates Notifications

There is a free service that will notify you when there are updates to Window Book software. Please go to our notification subscription page and select the products you want to be notified about.

[Sign up for Software Update Subscriptions \(/Support/Software-Update-Subscriptions\)](/Support/Software-Update-Subscriptions)

Note: Requires a Login Account

Make sure to review the product release notes pertaining to installation **PRIOR** to downloading and running any update.

NOTE: If you have more than one Window Book product all products should be updated at the same time to maintain compatibility.

What's New?

Don't miss out!

Click **HERE** to learn about what's new in our latest software release!

Software Prerequisites

Window Book software products require other software or 'prerequisites' to run properly.

If any or all of these prerequisites is not present when attempting to install the Window Book software, the installation routine will notify the user which prerequisites are needed and where they can be obtained from. When this occurs, the installation will abort. The installation of the Window Book software cannot be completed until the necessary prerequisites are installed, first.

Prerequisites are specific to each Window Book software product. Information about them, along with links for downloading are available on each product's software downloads page.

Useful Software

Window Book software product installations can sometimes be enhanced by installing additional software.

Microsoft® SQL Server® 2016 (and newer)

If you are using Microsoft SQL Server 2016 (or newer) with your Window Book software, you will need to install SQL Server Management Tools separately so that you can properly manage your SQL data and permissions. The Microsoft SQL Server 2016 installation (and newer) no longer contains Management Tools as older versions of MS SQL Server did.

Download SQL Server Management Studio (//s3.us-east-

Quick Start: Window Book's Installation and Set-up Services

Do you lack the necessary internal IT staff to download and install our software? Or do you always pay an outside consultant expensive rates for those services? For those of you that need help installing and setting up a new or recently-updated product*, Window Book offers **Quick Start** – a service available through our Professional Services Dept, and at a very reasonable rate! Please contact your Account Representative at 800-524-0380 (tel:+1-800-524-0380) to discuss purchasing **Quick Start**.

* - Installation and set-up of new or updated software releases is NOT a function or service of our Technical Support team.

Software Fulfillment

Window Book software is fulfilled via Internet download only. Specific requests for fulfillment via physical media must be made through your Account Representative and will be charged a shipping-and-handling fee.
