

Winning Feathers is an Atlanta based training institution with a wide network of experts with a focus on developing soft skills.

Our Mission

Empower kids to become leaders of tomorrow by developing soft skills required to be successful and happy. Just how feathers protect the birds, Winning Feather is founded with the same principle of developing soft skills to protect your child in an ever-changing global environment to help you win both socially and professionally.

Our Programs

Our online certification programs are designed by Ivy League professors and industry experts and proven to be highly effective. Each level advances the student to higher proficiency and a judgment-free environment to advance your child's skills. Each program has an ongoing follow up communication and invitation to formally organized competitions across the U.S. for students to practice and demonstrate their upgraded skill sets.
