Competitively-Priced  
Easy-To-Use  
Flexible Options  
100% Cloud-Based, No Software  
No Support Cost

### Cloud-based CASS Service for mailers, printers and letter shops.

If you submit Mail.dat® files or use metered mail, this is the solution you've been waiting for.

This website uses cookies to ensure you get the best experience on our website. Got it, I agree

- ✓ Our end-to-end solution automates CASS with an ALL Web-based solution - NO software to download, update, or manage.
- ✓ Flexible pricing options will fit any budget. NO hidden costs or additional fees.

Verifying data quality is instrumental in reaching your intended audience. CASS Processing validates every address in your file against all USPS delivery points. Your data will be returned in a standardized format and will include the necessary fields to qualify for automation postage discounts (i.e. ZIP+4, delivery point, and Carrier Route). For parcel shippers this process provides the 11-digit ZIP code required for USPS shipping discounts.
