

The image shows a product page for the Cascade Dropper Post. At the top, there is a navigation bar with a search icon, 'SHOP', 'ABOUT', the PNW logo, 'RESOURCES', 'CONTACT', a user icon, and a shopping bag icon. The main content area features a large image of the dropper post on the left. To its right, the product name 'CASCADE' is displayed in large letters, with a price of '\$ 179.00' and '439 Reviews' indicated by five stars. Below this, there are two selection steps: '1. CHOOSE DIAMETER' with options for 30.9mm (selected) and 31.6mm; and '2. CHOOSE TRAVEL' with options for 125mm (selected), 150mm, and 170mm. A 'NEED A LEVER?' section follows, stating 'You'll choose one in the next step.' and an 'ADD TO CART' button. At the bottom of the product area, three icons with checkmarks represent 'External Routing', 'Weather Proof Cartridge', and '3 Year Warranty'.

THE WORKHORSE

The Cascade dropper post pays homage to the Cascade mountain range, home to some of the best riding in the PNW. This post is a workhorse, it's super reliable, loved by our customers and provides flawless up and down service for the miles to come.

TIDY EXTERNAL ROUTING

The Cascade is built for bikes that don't offer internal routing, but it still ensures your cables are kept out of the way during up and down actuation by providing the external routing port at the midcap.

WEATHERPROOF SEALED AIR CARTRIDGE

Like all of our droppers, the Cascade rocks a sealed air cartridge that is known for its performance in below freezing temperatures. This design also makes the post easy to self service when it comes time for maintenance.

Pacific NW Approved
All Season reliability, tested in the mountains

EXTERNAL VS INTERNAL CABLE ROUTING

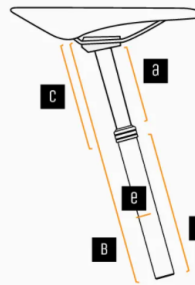

The Cascade is an externally routed dropper post, which means the cable will be secured to the outside of your bike frame. Determining what cable routing is compatible with your bike is the first step in picking dropper post compatibility.

HELPFUL TIPS TO DETERMINE ROUTING STYLE

- Does your bike currently have a dropper? If so, is the cable running through the inside of the frame (internal routing) or is it secured along the outside of your frame (external)?
- What's the age of your bike? Internal routing started around 2014 on high end mountain bikes and became more common on bikes after 2016 - if your bike is older than that it most likely is only compatible with external routing.
- Got a newer bike? Look for internal cable ports that would send the cable housing up the seat tube to the bottom of the post. Common spots for a port are towards the bottom of the seat tube, near the bottom bracket or possibly up near the head tube where your other internally routed cables enter.

LEVER COMPATIBILITY Compatible with all PNW levers and most cable actuated levers from other brands.

MANUALS

FAQ

Is this post compatible with my bike?

The Cascade is an externally routed post which makes it compatible with a lot of bikes, second is to confirm your seat tube diameter! Click here for help >>>

Does the post come w/ internal cable & housing?

We include our cable and housing kits with each of our levers. When you order the dropper by itself cable and housing will not be included.

How often do I need to service the post?

As riding frequency and conditions vary, we do not have a strict service interval. Instead, we recommend servicing your post if it starts to feel sticky/slows down. When it does come down to service it is a quick and easy, at home process.

What's the difference between the Cascade and the Pine Dropper Post?

The Cascade Dropper Post fits frames with seat tube diameters of 30.9 or 31.6mm, the Pine is the same style of post meant for 27.2mm seat tube diameters.

WARRANTY

PNW 3-Year Warranty

Do we have your back? Of course. If anything goes wrong, we're here to do everything we can to ensure you're taken care of.

REVIEWS

With a simple and reliable design and solid performance, there isn't much more I can ask for from a dropper post.

Jeff Barber, Singletracks.com

Easy install, smooth activation, better than expected. Parts are really high quality and pretty.

Paul Y. Verified Customer

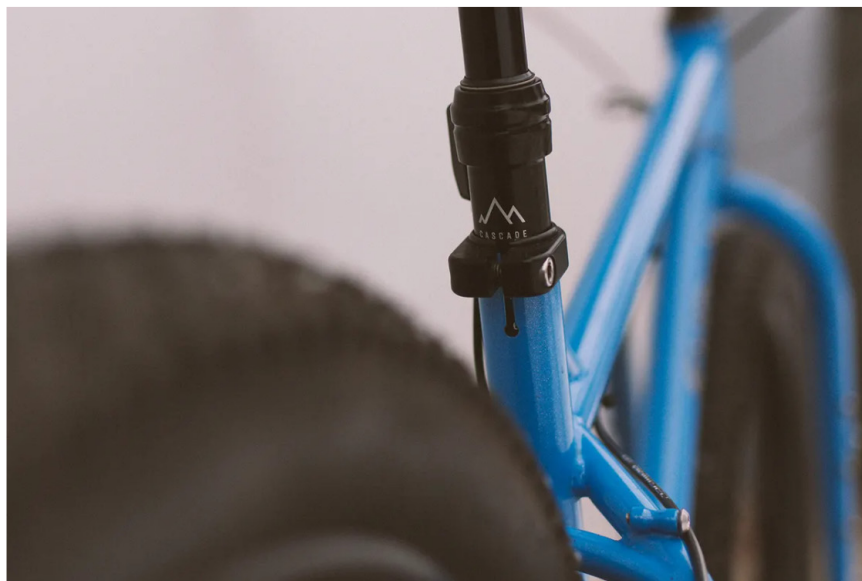

It's the smoothest dropper post I've used and the install went quicker than my cup of coffee.

★★★★★

Great post - outstanding service.
Post works great and was super easy to install. I ordered this for my 2015 Specialized Fatboy and after installing and riding it I love it. Customer service was awesome. I initially ordered the wrong diameter post and had to cancel it and reorder the correct size. Great to deal with PNW. Real people who communicate quickly and solve issues!

Love this dropper. It's way
Love this dropper. It's way smoother then my giant used to be. I'm curious what that bottom cap is for. I couldn't find any info on it

Cascade 125mm dropper works great!!
I love my dropper post! I works great, especially with a matching loam lever.
