DELIVER

Powerful sending infrastructure

Easy SMTP integration and a simple, RESTful API abstracts away the messy details of sending transactional or bulk email. Scale quickly, whether you need to send 10 or 10 million emails.

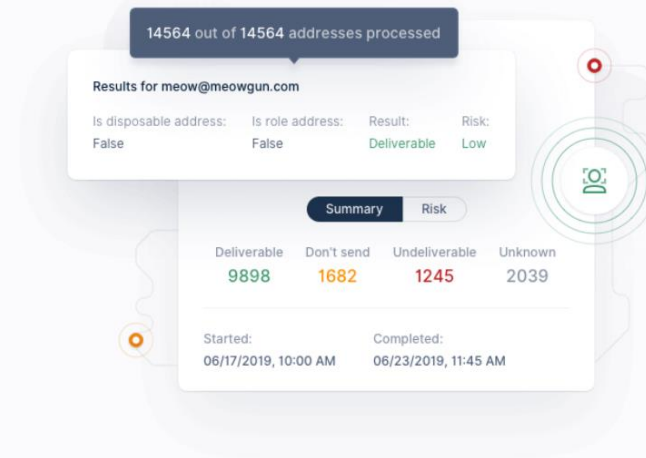

EMAIL API FEATURES

VERIFY

Fast, accurate email validation

Know exactly who you should (and shouldn't) send to. Integrate our real-time email validation API to protect your web forms or drag and drop your contact list to quickly weed out bad emails.

EMAIL VALIDATION FEATURES

DELIVERABILITY SERVICES

Managed email delivery for high volume senders

Sending millions of emails a month requires an extra level of diligence to achieve and maintain optimal deliverability and performance. Our experts help you get more emails delivered, with a strategy customized to your needs.

DEPLOY YOUR MESSAGE

Send an email with a few lines of code

Let's send your first email. Grab the code below in your preferred language and paste it into your terminal.

```
cURL Python Java Ruby PHP C# Node.js
1 # Try our API. Copy & run this in your terminal.
2
3
4 curl -s --user 'api:ENTER_API_KEY_HERE' \
5 https://api.mailgun.net/v3/samples.mailgun.org/messages \
6 -F from='Excited User <excited@samples.mailgun.org>' \
7 -F to='Meow Gun <meow.gun@mailgun.com>' \
8 -F subject='Hello Meow Gun' \
9 -F template='action' \
10 -F h:X-Mailgun-Variables '{"test": "test"}'
11
12
13
14 # Send an email using your Active Template with the above snippet
15 # You can see a record of this email in your logs:
16 # https://app.mailgun.com/app/logs.

```

Fast setup, easy integration

Get up and running today. We have a robust set of APIs and comprehensive documentation so you can spend less time adding email into your app and more time building cool stuff. Here's what needs to get done:

- 1 Activate your account**
After you sign up, check your email, click a link, and you're done.
- 2 Set up your domain name**
Add a couple DNS records so we know you own the domain you claim to be sending emails from.
- 3 Start sending**
Deploy the code wherever email fits into your app or plug your SMTP credentials into a tool of your choice.

Full endpoint documentation

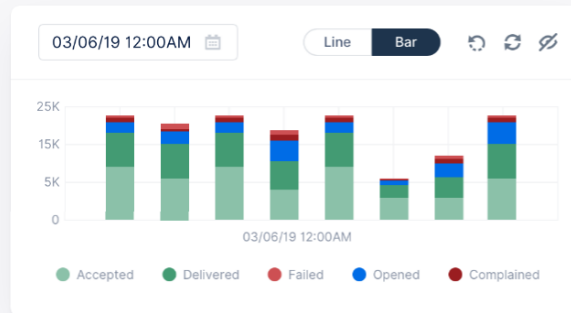

Our API reference includes code samples in your favorite language or framework.
