

## About POWERSYNC

### Leading Manufacturer of Advanced Energy Storage Systems

POWERSYNC Energy Solutions, LLC is a US based, family owned engineering company that designs and manufactures reliable advanced energy storage systems. We utilize cutting-edge technology and advanced systems to develop end-to-end solutions to fulfill your energy needs.

Our mission is to build upon our combined 80+ years of experience within our executive team to engineer and deliver the most advanced, cost efficient, and longest lasting energy storage systems at a residential, commercial, and industrial scale.

Our vision is to lead the energy storage industry by understanding, tackling, and developing solutions for the issues and engineering challenges that constrains the growth of renewable, sustainable, and affordable power storage systems.

POWERSYNC's engineering expertise, rigorous QA process, manufacturing scalability, certifications and renewable energy funding sources make us the preferred choice for energy storage solutions. We support our clients through the entire process of design, development, and commissioning and are ready to get started!
