# Fortress™ Stainless Steel Modular Room Systems

## BE AWESOME ... NOT AVERAGE™

From day one of mFPHD, we have set the bar higher and challenged ourselves to meet a standard best summed up by our company motto: **Be Awesome - Not Average.** At every hospital our goal is to **Be Awesome** in fulfilling your design vision, in efficiently building the finest stainless steel modular rooms - and, in protecting your world. We know to reach that goal the word 'Awesome' must carry through to every aspect of the mFPHD Fortress™ Room System.

'Awesome' sums up the unmatched **Infection Prevention** provided by stainless steel's easy-to-clean nature and mFPHD's product design, which eliminates horizontal ledges where contaminants occur naturally.

'Awesome' describes the ability to **Build Faster** with our modular solution. It means rooms open—and start producing revenue—earlier!

And, since every panel in our system is an access panel, device upgrades, that eliminate obsolete technologies, happen easily, quickly - often overnight with no shut down! Now, that's **Awesome!**

Think about it: One solution that can protect against infection, protect your bottom line and protect you against obsolescence. It's what your hospital needs to **Be Awesome.**

Our goal is to grow our position as North America's #1 Surgical Wall System supplier. We see only one way to do that: through meticulous attention to detail and unmatched customer satisfaction. It's a higher standard. One we are committed to maintaining. From patients and staff to technology and your bottom line, this Fortress™ protects your world - all of it.
