Closer encounters. The heard kind.

YOU + SLANG = CSAT BIG BANG

When your customers call, they expect to be in the same universe as the rest of your branded properties. They want personalized resolutions to their problems delivered at the speed of light.

Keep them happily in your orbit, coming back again and again with a unique, consistent and delightful experience.

Boldy Go

Your star, born.

SLANG + YOU = SONIC TELEPHONIC CAN DO

Most phone solutions use outdated IVRs. And let's be honest. Those experiences suck. Don't let the phone be an experiential black hole.

Slang enables you to literally build a virtual voice that shines like a star on your most important channel. All while helping you effortlessly scale customer service operations with maximum efficiency.

More than meets the ear. A whole lot more.

Talk less. Do more.

Slang is your robo-sapien team member who speaks your native tongue, uses your systems, and resolves your callers' issues with style.

Brand liftoff.

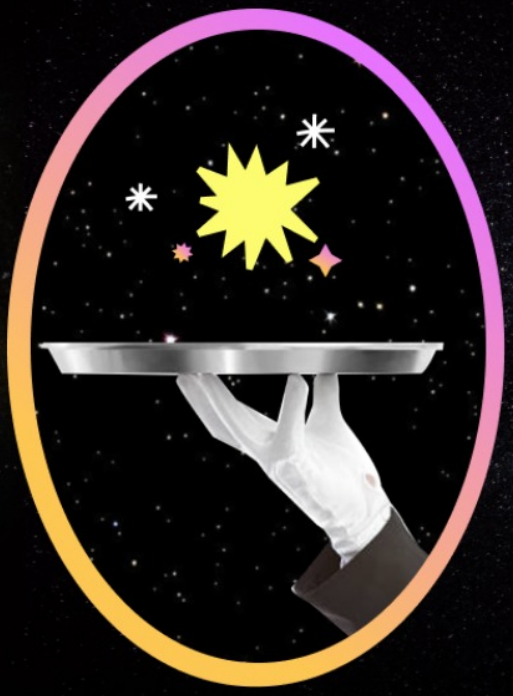
Full blown interactive audio experiences seamlessly blend speech, music and earmojis. Go beyond human limitations. Tweak instantly and infinitely to perfect your brand's voice and sound.

X-ray vision.

Slang integrates with your data, so it knows your customers, greets them personally, and predicts why they're calling. It even remembers them when they call back.

Warp Drive Engaged

Zero gravity.



Zero friction. Big payoff.

No code snippets or complex phone trees needed.
No required changes to your existing tech stack. Configure and launch in hours an experience that feels like it took months to design and implement.

See the invisible with Slang's dead-simple analytics. Use unique and accurate data to unlock invaluable insights: trending products, keywords, detailed caller stats, and more. Plus, Slang uses smartyficial intelligence to tag contact reasons for you -- no more manual tagging!

80%+

Inbound calls resolved without human involvement. Never answer “where’s my order” again!

200+

Hours saved per month. Time is money. We save you the latter by giving you more of the former.

Anti-testimonials.
