4-channel, 3-channel

**Other characteristics**

compact, digital, with evoked potential monitoring, computer-based

**DESCRIPTION**

The Natus UltraPro S100 EMG / NCS / EP System is a high-quality all-in-one electrodiagnostic system with dedicated controls, integrated stimulators and exceptional signal quality. The UltraPro S100 facilitates the diagnosis of multiple neuromuscular disorders including carpal tunnel syndrome, myasthenia gravis and ALS. The Natus UltraPro S100 is powered by Viking® or Synergy Software and uses only 3 cables for easy installation. Natus' proven excellence in Electrodiagnostic Systems continues with the UltraPro S100, providing the best in reliability, performance, and value.

Efficiency

All-in-one electrodiagnostic system with dedicated controls

Triple programmable foot-switch supports hands-free operation  
Lightweight system that travels easily in a roller case or can be cart mounted

Quality Test Results

3- or 4-channel amplifier options that allow for electrodes to remain in place, accommodating the most common modalities  
Integrated stimulators  
Exceptional audio  
Low noise levels for exceptional signal quality

Intuitive Operation

Simple user interface allows you to navigate through procedures quickly to reduce testing time  
The one-button EMR interface allows you to connect results more efficiently to electronic medical records  
Programmable probe controls allowing intuitive and fast operation  
Automatic reporting, online summaries and built-in reference value database saves you time and generates reports faster

Exceptional Value

Affordable equipment that meets your diagnostic needs  
The UltraPro S100 system includes instructional video, help menu and training classes, virtually eliminating training expenses
