

Sustainability

Our Commitment

Sustainability-Linked Bond

Reducing Water Stress Through Water Recycling

Advancing Sustainability with Leading Technology-Enabled Solutions

Responsibly Building Permanent Infrastructure

Commitment to the Environment and Safety

Our Commitment

Solaris Water manages all aspects of produced water takeaway and recycling for the largest operators in the water-stressed Permian Basin.

Solaris Water reduces the industry's consumption of fresh and non-potable water in the world's premier energy-producing region.

We build and operate expansive, integrated produced water infrastructure, develop and deploy leading water technology and provide the logistical expertise needed to eliminate the industry's freshwater footprint, a pivotal step for the Oil and Gas industry to achieve ESG compliance.

We are committed to a greener future and exceeding the high standards set by our customers, global regulators and the global investment community. By executing on our Commitment, we enable our customers to exceed their own water, safety and community commitments and focus on their core business.
