

Operations Overview

Solaris Water is a leading developer and operator of critical water infrastructure assets in the Midland and Delaware Basins. Our growing infrastructure footprint allows us to aggregate large volumes of produced water from multiple operators to reliably and responsibly treat and redeliver recycled volumes back to our customers. We safely dispose of produced water that is not recycled in saltwater disposal wells.

| | | |
|--|--|--|
| Dedicated Acres: ~700,000 | Contracted Customers: 35 customers | Barrels recycled to date: >30 million |
| Miles of pipeline: ~630 | Permitted disposal capacity: >3.0 million per day | |
| Permitted barrels of recycling capacity: 900,000 per day | | |
