## You Sign What You See

By using QR code transmissions, we have eliminated potential malware infiltration risks and delivered a level of transparency that just isn't possible with Bluetooth or USB.

Learn how you can verify each and every transmission that comes into or out of the Keystone.

## EAL 5+ Secure Element

A proprietary bank-grade Secure Element ensures your private keys never leave the Keystone. The Secure Element generates a true random number for your private keys and is vital to ensuring your crypto assets are stored in the safest way possible. Our BIP32, BIP39, and BIP44 compliant firmware is also open source.

## Testimonials

“

The Cobo Vault Pro (Keystone) and Essential hardware cryptocurrency wallets deliver a compelling package for cryptocurrency holders who are looking to take the security of their crypto assets to the next level.

“

We are impressed with the thought that has gone into the product, which is clearly reflected in the features offered in the Cobo Vault (Keystone). It represents the new generation of crypto wallet, with much more attention to detail in securing user funds.
