

## Emergency Communication Made Easy

### Connect when it counts with Konexus.

Konexus' next-generation emergency notification and critical event management platform is the easiest way to alert your team and coordinate your disaster recovery in an emergency. Our fully integrated, all-in-one solution allows you to streamline incident reporting, response, and resolution all from a mobile app. With convenient communication features, our software enables you to plan for potential crises, communicate and react during these crises, and move forward after the crisis has passed. Given Konexus' ease of use and advanced communication features, it's no wonder that hundreds of organizations trust Konexus to protect their business.

### Always Available

We understand that implementing new software in your day-to-day operations can be challenging, so we offer live online sessions, webinars, and documentation to ensure that learning to use Konexus is easy. We believe that any business built to create and enhance connection should be just as accessible as the solutions it provides, so we always make ourselves available.

## Customer Success is our #1 Priority

### Smart

Konexus can help you prepare for a crisis by planning messages for individual incidents and selecting specific groups for communication.

### Easy

With a straightforward design, Konexus' app and web UI allow you to quickly communicate with your team and track your crisis response.

### Success

Konexus is dedicated to your success, so we offer customers 24/7 support and a dedicated customer success manager.

# Streamline communication and your emergency response plan with Konexus. Konexus' features include:

## Core

The perfect plan for organizations that need basic emergency notification features.

### Multi-Channel Alerting

With our mobile app and web UI, alert your employees or public via mobile push, email, SMS, push, voice, paging, fax, Slack, Microsoft Teams, and more.

### Templates

Plan ahead with alerting and poll templates to quickly check in with your people and survey large groups.

### Polling

Utilize polls to assess personal safety and your organization's status. All results are visible in an easy-to-read report on all platforms.

### Geofenced Alerting

Visualize and triage your incident event data with our highly advanced ESRI Mapping features, and use custom layers and drawing tools to create a geofence to target a specific group of people for communication.

### Mobile App

Alert your employees, report incidents from the scene, collaborate, and coordinate your crisis response with Konexus' easy-to-use mobile app.

## Pro

With all of the Core Plan features, the Pro Plan is for businesses ready to incorporate crisis management features.

### Secure Chat

Follow up on polls or messages with Secure Chat to initiate direct two-way communication.

### Incident Management

Alert employees when a crisis occurs and send instructions for how to proceed.

### Incident Guide

View role-specific procedures for a variety of emergencies and disruptions to daily operations.

### Tasklists

Plan, activate, and track your crisis response and recovery from your mobile app by turning response plans into actionable task lists and delivering them to assigned teams.

### Single Sign On

Simplify and secure employees' login process with single sign on.

## Connecting with Konexus

Konexus connects your organization at critical times. Our software will facilitate communication with your audience whenever and wherever you are speaking with them.

**Find out more about how Konexus makes connecting easy at [konexus.com](https://www.konexus.com).**

## Connected Through Konexus

Join the organizations who already trust Konexus to protect their business.

# Custom Enterprise

The most powerful option for enterprises in need of our critical event management features, this plan includes everything in the Pro plan and additional features to enhance communication.

## Critical Event Management

Initiate and monitor active events that are impacting your organization from the mobile app and web dashboard, and view each event's communication and recovery history. Gain insights into events' severity level, priority, and status worldwide in map view, and grant certain users attribute-based access to specific events and incident types.

## Business Continuity Plans

Transform your business continuity plans into a mobile accessible format. Converted plans are available regardless of connectivity to allow your organization continuous access during an emergency. Imported content can be assigned and permissioned based on a user's role within the system.

## Archer Integrations

Access plans housed in RSA Archer without internet or cellular connection, deliver recovery tasks and assessments to response teams, and monitor completion from RSA Archer or the Konexus app using the Konexus extension for the RSA Archer BC/DR use case.

## API Integrations

Retrieve data from Konexus, or share data with Konexus for two-way data exchange between systems.

## In-Stream Translation

Translate in-stream messages in 70+ languages so your organization can collaborate globally.
