

**CUSTOMER FAVORITE!**

Two silos of even, consistent heating

**WHY PLATE HEATING IS IMPORTANT...**

- The #1 reason for cold food is plates not being heated properly, making plate-heating systems so important to help ensure proper serving temperatures of food
- Keep in mind that convection plate heaters will heat more evenly than radiant
- Use the chart to find the system and hold times you need
- To help determine right size, stack your plates to see if they would fit into the silos and adjust the overall quantity of silos if needed

#33690
