VECTOR

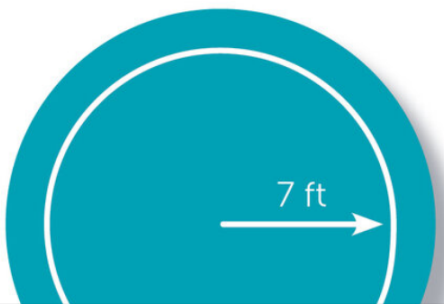

Experience the Magnitude of Motion

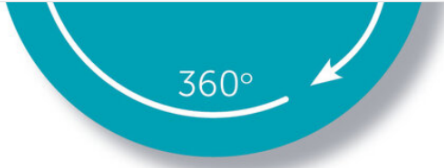

The VECTOR Suspension System by Tollos transfers lead apron weight away from the body.

Work in comfort, with less stress and fatigue — and with no extra equipment necessary.

VECTOR allows unrestricted movement - with a full 7 ft radius.

VECTOR Hotline: vector@tollos.com | 800-893-0638

- VECTOR provides full-motion mobility.
- VECTOR helps reduce surgical fatigue.
- VECTOR gives support and protection during procedures.
- VECTOR is easy to install and easy to use.
- VECTOR works with virtually any lead apron.
- Proudly made in North America.

Questions? Let us know!

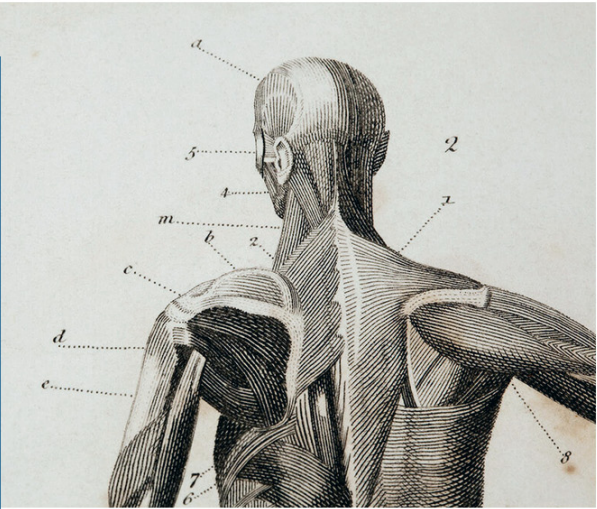

Brochure

Many lead aprons weigh more than 10 pounds. Depending on the body movement, even a 10 pound apron adds an extra 15 to 50 pounds of force on your joints.

With the most conservative estimate possible, a provider who wears a 10 pound apron only half the time at work experiences a staggering 39,000 pounds of force.
