HARDIE BOYS, INC.

Established in 1997

Hardie Boys, Inc., is South Florida's premier manufacturer of exterior architectural millwork. We design and manufacture columns, louvers, brackets, soffit systems and other cellular PVC products.

With over 15 years of experience developing exterior products in the coastal South Florida climate we are introducing an ever evolving product line which is unmatched in durability and beauty. In addition to our product line and existing profiles we excel at meeting custom design specifications.

The combination of innovative techniques, cutting edge technology, and the versatility of cellular PVC gives us more flexibility in design and scale than more traditional building products like wood, aluminum or foam.

Our design style is strongly influenced by British West Indies architecture. Our portfolio features British West Indies home designs of some of the top architects in Florida and the Caribbean, as well as exteriors designed by Hardie Boys, Inc.. We hope that our passion for British Coastal Indies architecture shows in our work and provides design inspiration for others.

Though the British West Indies style might be our first love, our products fit a wide range of architectural styles - Coastal, Florida Vernacular, Key West, Dutch West Indies and more.

- 68** HB PORTFOLIO

HB PVC Soffit Systems typically have 4 components - fascia, soffit panel, frieze board and rafter tails. These components can be used together as a system or individually. Our v-groove soffit panel and rafter tails create the appearance of a traditional timber framed roof with tongue and groove roof decking.
