

Right Drug. Right Dose.

Not all medications work the same in your body.
What works for others may not work for you.

Why Should I Get Tested?

- ✔ Improve the effectiveness of the medications you take.
- ✔ Avoid buying and using drugs that won't work for you.
- ✔ Reduce negative side effects.
- ✔ Prevent serious drug reactions.

Why PGx Testing?

Healthcare providers can make safer, more informed prescribing decisions based on your unique genetic characteristics.

Ask Your Physician For RESPONSE™ PGx Test Today!
