

Key Specifications

Atles is an automatic system that requires no manual operation while the extraction process is taking place. The system runs on 200-proof ethanol and evacuates and transfers an emulsion from stage to stage in a fully enclosed, recirculating closed loop. Atles requires 30 amps @ 480 volts of power and 20'x 10' x 9' of clear space for safe operation.

- 90 lb / 1 hour extraction throughput
- 600L/165 gal. ethanol holding capacity
- 85% solvent recovery rate
- 98.6% efficient with no post processing required
- Terpene content yield: 3%-9%
- Super-cool extraction
