

RELIEF™ is used to treat patients who are suffering from acute and chronic pain due to connective tissue injuries. Many of these conditions are painful, result in limited mobility and are difficult to heal.

EVALUATE

We use shear-wave elastography and dynamic ultrasound imaging to identify connective tissue abnormalities and locate entrapped nerves to determine the root cause of your problem

UNLOCK

Under ultrasound guidance we free nerves from entrapment, eliminate stubborn scar tissue, and restore your body to its naturally healthy state. We do not perform surgery. We do not use medication, steroids or stem cells.

RESET AND RESTORE

To catalyze your body's natural healing ability, promote tissue remodeling and regeneration, inhibit inflammation and suppress scar tissue formation, we use a natural combination of growth factors, collagen, extracellular proteins and bio-active molecules from
