EDM Collective
Submissions: xilecollective@gmail.com

About Us:
We are an EDM collective based out of San Francisco, California with the primary purpose to bring attention to those artist who deserve it. Record labels, collectives, teams, and crews refuse to release a lot of well produced material simply due to a small following. (For example: A label refuses your release because it doesn't serve the interest of their teams exponential growth). If you've got a track that is well produced, consider shooting us an email! We support those artist who feel like they're barred from the increasingly capitalist music industry, do not be afraid to be heard!

Above all else, we support each and everyone of you making music no matter the genre. Creativity in the age of globalization is threatened, we want you all to have a place to express that creativity.
