★★★★☆ **A bright light**

This is a bright light. I lights ny basement work area well. I have a hard time seeing that it is any brighter than the 50 watt llight on the other side of the basement. It is difficult to judge because it is slightly bluer. It is much brighter than the 50 watt CFL it replaced and it makes my work area very bright. If they would leave out the adapter and lower the price it would be better.

I needed a good work light in the garage and combined this monstrous LED light with a pendant light cord from the local hardware store and I couldn't be happier. This bulb is extremely light and covers the entire garage with cool white light.

★★★★★ **Great large open space bulb.**

Way brighter than I expected. I was pleasantly surprised. Lights up the whole garage with just 75 watts instead of 6 100 watt bulbs like we used to use. Going to recommend them to a few gyms I know that need new lighting and need the bigger socket bulbs, but this includes the adapter.

This bulb is very bright. It illuminates very bright white light. It is large in size. I ordered this to use it in my garage. Since it is a huge bulb, it didn't fit in the existing light fixture directly. So, I added an extension to make it work.

This is a very bright bulb but since it has a cover, it doesn't blind me like other high power LED bulbs. It is much brighter than the bulb I had there before
