## Our Services

### Medication Regimen Review

When we approach a medication review, we look for all potential pitfalls that could lead to negative outcomes and increased medication burden, such as falls or unanticipated side effects.

- ✓ Reduce unnecessary medication use
- ✓ Minimize Fall Risk
- ✓ Minimize potential drug-drug and drug-disease state interactions
- ✓ Prevent Rehospitalization

## Drug Destruction

Return, destroy and dispose. Punching pills out of blister packs can be a time consuming process. For most institutions this means manual labor. At Medication Managers we have innovative and efficient strategies to limit the amount of time it takes to complete this task.

- ✓ Reduce time
- ✓ Reduce Effort
- ✓ Improve efficiencies

## Drug Return Programs

We do drug returns at the same time of drug destruction. Why is this important? Returning unused medications in a timely fashion ensures that your facility receives the credits they are due for unused medications.

- ✓ Improve bottom line
- ✓ Improve credit processing
- ✓ Reduced workload for staff

## Formulary Management

Our formulary management program ensures your elderly population gets the most appropriate, safest, and most cost effective. This means better management of your Part A budgets and better care for your patients.

- ✓ Limit unnecessary duplication
- ✓ Institute the most cost effective medications
- ✓ Limit disruptions

## New Admission/Change in Condition

We complete New Admission or Changing Condition reviews for patients within 24 hours. Combined with our same day reporting program, your facility gets the most cost effective, appropriate care solution.

- ✓ Early identification of inappropriate medications
- ✓ Implement cost effective solutions sooner
- ✓ Side Effect Identification

## Drug Storage Management

One of the most common problems long term facilities face is how to properly store medications. Our program helps identify the right procedures needed for proper storage of medications and well as ensuring expired medications are dealt with appropriately.

- ✓ Improve regulatory compliance
- ✓ Reduce risk
- ✓ Ensure appropriate dose reduction for psycho active medications

## Narcotic Control

Ensuring medication administration records and narcotic administration records are consistent with what the patient is actually receiving. We ensure that all policies and procedures related to narcotic control are compliant, eliminating regulatory and legal risk and medication diversion.

- ✓ Reduce time
- ✓ Reduce Effort
- ✓ Improve efficiencies

## Regulatory Compliance

- ✓ Reduce and eliminate the use of unnecessary medications
- ✓ Review monthly psychoactive medication use

- ✓ Monitor for appropriate diagnosis and appropriateness of use
  - ✓ Ensure appropriate monitoring of all medications
  - ✓ Monitor for compliance with state and federal regulations
-
