Description

Are you tired of eating lunch at your desk and staying after hours or working from home to complete your progress notes?

Documentation is the main cause of physician burnout.

Discover a simple fix to take back control of your time in the clinic and enjoy practicing medicine.

Document at the speed of light with KISS dot phrases

As a primary care physician, you know that completing clinic notes while you're treating many patients is time-consuming and challenging. That's why StatNote, a library of more than 1,000 medical templates, was created for you. It reduces busy work and enables you to focus on the most important part of the office visit: your patient.

Capture the essentials of the visit with minimal effort with our KISS dot phrases.

StatNote's dot phrases will help you:

- Efficiently document office visits and common procedures.
- Document with point-of-care evidence-
