- Long battery use and wireless charging: Can be minimum used for 3 weeks after being fully charged. Wireless charging is more safe and convenient.

Why You need our factory Sonic toothbrush:

Introducing you our Sonic tooth health Care Protective sonic electric toothbrush. The pressure sensor allows you to give your gums an extra gentle clean and improve your gum health to 100% vs a manual toothbrush.

Healthier gums. Gently does it.

Our Sonic electric toothbrush uses the unique sonic technology which drives fluid deep between teeth along with the specially designed brush heads to gently but effectively remove plaque in-between teeth and along the gum line. Simply brush with the toothbrush 2 minutes twice a day for increased plaque removal.

The in-built pressure sensor alerts you when you are brushing too hard to ensure that you do not damage your teeth and gums. Dental Professionals recommend to replace your brush head every 3 months, however we understand it can be hard to remember when you switch brush heads and is your current brush head still okay to use? The new brush head replacement reminder technology measures your usage and brushing pressure and alerts you to replace your brush head when it's no longer performing optimally to ensure you are consistently getting the best cleaning results.

Pressure Sensor

Alerts you when you are brushing too hard.

Brush Head Replacement Reminder

Alerts you to replace your brush head when it's no longer performing optimally.

Smart Brush Heads

Look for the symbol on replacement brush heads to ensure compatibility with the replacement reminder technology.
