

Expect A Massive Upgrade

Mycelium Wallet is great for bitcoiners. We will make it useful for everybody.

Not Leaving Mankind Overboard

Bitcoiners know: no matter how hard banks try, a good wallet is still better than any e-banking app. We feel we should invite the fat people to test the privilege.

API

Numerous Integrations

Many third party providers are willing to integrate with us. Fiat handling and other paid services will speed up Mycellium's adoption and generate profits.

DAPPS

More DAPPS

New initiatives such as colored coins and new PoS blockchains will open new opportunities.

UX | UI

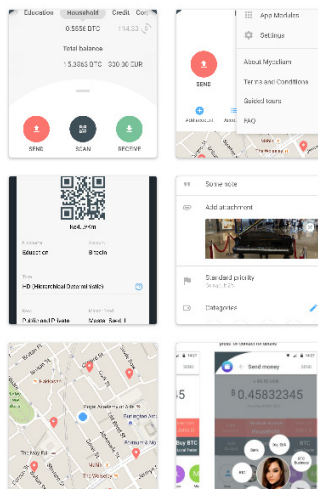

Categorization

The "handle money" paradigm will be extended to multifaceted concepts of personal finance, value administration, and social interaction.

Top 7 New Tools Coming Soon

- 1) Fiat accounts: fully-fledged, blockchain based.
- 2) Inexpensive remittance: most popular corridors.
- 3) Debit cards. Wallet - linked and in-wallet-issued.
- 4) Personal finance: convenient handling of bills and invoices.
- 5) Investments: efficient portfolios and hedging.
- 6) Escrow-protected business transactions and bets.
- 7) Crypto assets creation and exchange.

MYCELIUM

IMPORTANT:

The crowdsale offer refers to the Wallet project only. No refunds. Token is not a security, is not listed, authorized, issued or traded on any regulated market. We do not guarantee that the value of tokens will increase.
