Carbon Clad™

Wood

A lightweight panel that combines the strength of a carbon fiber core with the beauty and warmth of wood for a rich aesthetic experience.

Carbon cedar

Carbon cherry

Carbon teak

Carbon birch

Carbon mahogany

Carbon red oak

Carbon|walnut

Carbon|Clad[™] panels are lightweight, rigid and easy to work with.

Natural Wood Veneer face (1 or 2 sides)

Recycled Carbon Fiber Core

Carbon Clad[™]

Innovative, Durable and Lightweight

Finish Options

All Carbon|Clad $^{\rm M}$ Wood veneers can be finished to match your specifications. We will work with you to find the perfect hand rubbed or clearcoat finish for your project.

Mounting Options

Carbon|Clad™ Wood panels can be easily installed with a variety of hardware or adhesive options. Please see our Mounting and Installation Guide for selecting the appropriate system.

Panel Thickness

Carbon|Clad $^{\text{M}}$ panels can be produced in custom thickness to suite your specific needs. Our stock panels come in 0.125" and 0.250" thick.

Wood

Sustainable – uses recycled aerospace carbon fiber, typically 85% by weight.

Lightweight - 50% reduction in thickness and weight vs. solid wood for the same load deflection.

Easier to handle – install and support than solid wood.

Reduced Shipping Cost

Less structure needed to support panels

Rigid - 16x increase in panel rigidity vs. solid wood of the same thickness.

Modifiable – panels can be modified on-site with carbide hand tools.

Durable – will not degrade or warp over time. Will not shrink or expand due to temperature or moisture.

Panel size of up to 48" x 96"
