### Awesome camera!!

Reviewed in the United States on October 6, 2019

Color: white **Verified Purchase**

I love this camera! I bought it because my 9 year old was getting into trouble. My room was upstairs and hers is downstairs and I wanted to be notified if she was getting out of her room,

1 star   13%

[How does Amazon calculate star ratings?](#)

doing something,etc. this camera works amazing! Night vision is great! Sound detection is awesome. It has audio so I can talk to her. It saves recorded events if I'm sleeping or not at home so I can go back and watch. I'm definitely going to be buying another for the living room to use while I'm away.

Also really easy set up!

**Great and easy to use**

Reviewed in the United States on May 13, 2019

Color: white **Verified Purchase**

Used while my house was on the market and agents would just "show" up. Surprisingly easy to use and set up. Also the app worked on my data as long as camera located was connect to wifi. This was important because my wifi at work in spotty.

**Cheap and Good Enough**

Reviewed in the United States on September 25, 2019

Color: white **Verified Purchase**

I bought one of these to keep on eye on my cat while I'm at work. I read a lot of reviews for similar cameras in this price point. I'm happy with it, the only issue is that I can't figure out how to get the footage to save to the SD card that I installed. I'm not even sure that the card fits in there correctly. I won't pay for the monthly subscription to save footage because I have other cameras setup for which I do pay a subscription. I'm going to take another look at the SD card situation, but other than that, this is good if you just need to keep an eye on something and you don't need to keep the recordings.

**Hard to configure, bad sound. Scary expected hacks**

Reviewed in the United States on December 20, 2019

Color: white **Verified Purchase**

The camera is barely a brand name, made in China as I could not find domestic versions. Instructions are so small and some parts unreadable without magnification. Set up is not smooth. The image is good, however. The camera movement over wifi is not smooth and controls are clunky. IR image is good. Audio is horrible sending or receiving. When I set up the option for Cloud WIFI was expensive and I did not want the Chinese company to get my card info. The SD slot I have yet to fit my 64GB Mini SD card as it is not well designed and the card

seems to not be readable to the device. I will keep trying with the good Samsung SD to get it properly inserted and aligned so I can record locally. I am a bit dubious about Chinese micro components where it is easy to build a back door so hacking is available to the original component manufacturer at any time and I imagine most Chinese manufacturers monetize the security breachable device back to large hacking entities like government or sub government spy networks. I will look for a better camera and current fearfulness will reduce but I know all cams are hackable so I will keep it covered while on if at home and only use it when away. Bad sound really ruined the camera. All else was promising. Get what you pay for but best cams are hacked too.
