Description

Reviews (0)

- What you get: 120 pieces of 5 mm LED diode light assortment in 6 different color and 20 pieces of each color, DC (20mA), transparent round head and 2 leads, 1 roll of double sided copper foil tape, 5 mm wide and 10 m/ 32.8 feet long
- Practical kit: the 5mm 2pin light emitting diodes can be applied for various electronic experiments, science projects experiments, school science and more, the both sides of copper foil tape can carry current
- Nice performance: the power of LED round lamps is about 0.06W, the voltage is different for different powers, low consumption but nice energy efficiency, easy to use and work well with different electronic and electrical components
