

# Did You Know?

I.Dekk™ offers more than just beauty. Its patented formulation is, in part, what makes it a step above the competition. With a combination of Biodac®, rice hulls, high density polyethylene resins, and other high quality ingredients, I.Dekk™ has high fade resistance and very minimal water absorption in comparison to its wood composite competitors. Its strong I-Beam construction creates a stronger deck board than the competition even though it is lighter in weight and won't rot or mold.

I.Dekk™ contains no wood fillers unlike many other alternative decking products in the market. Over 50% of the materials in I.Dekk™ are either rapidly renewable resources or reclaimed material that would normally be landfilled. Our formulation is why I.Dekk™ is the solution to creating a dream outdoor living space.
