Komarc's growing brand of cool and unique products!

Play with Family, friends and colleagues. Whether you're at home, at a party, in school or in the office!

All of our products crossover to multiple cultures worldwide. Physical skill, laughter and strategic thinking have no international boundaries.

And look for Komarc's products in 30 countries by end of 2020.

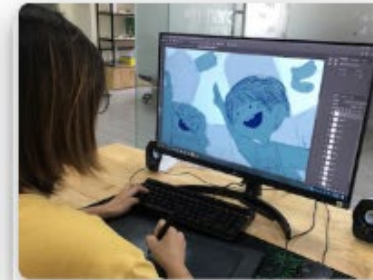

We offer custom branding and packaging for any language and country in the world.

Balance, Grab, Bounce, Throw or Stack

At Komarc Games, we believe in Hands-on-Fun. A little less time on the phone and more time interacting with friends and family.

Whether you're balancing a long row of discs, throwing snacks at Jack, bouncing a ball, grabbing a tiny camera or stacking picturebricks... you will always have a blast with Komarc's games!

SEVEN YEARS designing and developing games and toys.

Komarc's creative team works around the clock, designing and branding great products. This includes a group of dedicated and highly talented graphic artists, illustrators and product designers.

It takes between 6 months to 3 years (in design and development) for these exciting games and toys to be ready for market.

Production Capabilities

Komarc Games offers a wide range of production capabilities (in Vietnam and China) for clients worldwide. The company specializes in wood production, printed materials, and plastic components.

With 26 years of design and manufacturing experience, you can count on Komarc for competitive prices, high quality standards, and fast turnarounds. Products include board games, toys, puzzles, boxes, point of sale, promotional items and other related goods.

Wood Production	Plastic Production	Print Production	Quality Control
-----------------	--------------------	------------------	-----------------

Wood Production

Komarc Games Vietnam specializes in manufacturing wood products, including game components, toys, displays and some household items. The company uses mainly Acacia and Rubberwood, both native to Vietnam, as well as, Beech, White Oak, Teak, and other imports.

The company has two main wood production facilities in South Vietnam, plus the Hoc Mon plant for quality control and assembly.

Komarc's broad range of capabilities include wood drying (kilns), sanding, cutting, CNC, laser cutting and more. In addition, the company can do pad printing, silk screen printing, spray painting and hand painting.

Komarc can handle small to high volume production needs, with highly competitive prices and very good turnaround times.

Plastic Production

Komarc's main manufacturing facilities for plastic parts are in Wenzhou, Zhejiang Province, China. This includes 2 main factories for injection molding and one separate facility for tooling. The company has 5 injection molding machines, and 2 CNC machines for building molds. Komarc can make custom parts in a wide range of sizes, as big as 50cm or very small parts, less than 1cm.

Komarc also offers finishing options, including, polishing, silk screen printing and painting.

The primary materials used for plastic parts and for toys include ABS, Acrylic, PP, PU, PVC and PS. Typical lead time for tooling is 15 to 30 days. The company also offers low cost molds for short run sampling. Sample time is 5 to 15 days.

Komarc also makes custom silicone molds for a range of resin and soft PU items.

And 3D custom prototypes can often be finished in less than a week. The material for most prototypes is ABS.

Quality Control

In 2007, Komarc set up quality control, packaging and assembly operations in Vietnam. Now, the Vietnam division, Komarc Games Vietnam, also offers finishing and some box making. It's important that every product is consistent, and retail ready, for their clients, distributors and partners.

The company has implemented the proper policies and procedures to insure social compliance at every level. This includes overtime, age of workers, work environment, health and safety.

The company complies with all heavy metal testing requirements and uses only non-toxic inks. Komarc's factory partners have also passed numerous social and quality audits from Bureau Veritas, Intertek, SGS and others.
