Rotors went on just like OEM and look impressive. They are labeled "front driver" and "front passenger" so you know where to put them. The rotors have stayed rust free since installed. I still have OEM rotors on the rear and when it rains there is always a little rust on them - but so far, none on these. The brake pads come with all of the equipment needed, including brake grease. The brake pads did not go in as easily as OEM pads, but it was not a big deal. The break-in instructions were clear and easy to follow. Braking is smooth and silent, with no vibration at all. The brakes have a little bite to them as well, which I like.
