The sucker is especially easy to use on the tiles, it won't fall over at all, the baby likes it very much

I can finally solve the room with my hands, cook by myself, wash clothes, etc. I'm not afraid of anything. It's the savior of Bao's mother. The colors are also good-looking. The baby also likes to play in it and can walk along for practice.

The design of this fence is also better, it is all snapped, no tools are needed, easy to install

The gears of the fun fence are very interesting for babies and have fun playing. The design of the gate fence is also very reasonable and easy to open and close.

The color is very beautiful and gentle, and the workmanship is very good.

The material is very safe, it is safe for the baby to use, and there is no taste when the goods are received, and the color matching is also very beautiful. It can liberate mothers' hands and satisfy the girls' hearts of mothers. It is really beautiful and practical, usually Put the baby in the fence so that the mother can do other things on her own, safe and assured

Simple assembly, easy to use, safe material, no smell

Compared with many anti-collision game fences, they are safe and smell-free, and they are very heavy. The firmness shown by this is that the dolls are not likely to climb now. Wait a few days and a few days before putting them together and putting them underground for the dolls to play.

It's best to deal with a little girl who is crawling all over the floor for 10 and a half months. Give her space to play without worrying about bumps and bumps. I can do something else by myself. The fence is really a good thing.
