“

Seragon pharmaceuticals is a global biotechnology company providing smart and innovative solutions to the world's evolving pharmaceutical needs

”

Who we are

Seragon Pharmaceuticals was founded by scientists, dedicated to leveraging expertise in biomedical research to optimize human health and longevity. We reflect years of experience in various clinical, biomedical and research environments. Using our combined knowledge and experience, we strive to bring the most advanced health optimization and longevity products to the market.

Additionally, we offer various laboratory and consulting services to our pharmaceutical industry. Seragon operates state-of-the-art biological research and testing facilities which provide invaluable services to our strategic associates.

Although our portfolio represents years of knowledge and progression, the road forward has shown us how much progress there is still to be made.

Our Team

Seragon is a growing team of gifted scientists, researchers, and creative professionals dedicated to innovation, and playing a key role in redefining health care for the consumer.

Our company headquarters is in Irvine, CA.
