Brand	Habor
Color	Black
Capacity	1.7 Liters
Material	304 Food Grade Stainless Steel
Wattage	1500 Watts

About this item

- [More Safely & Healthier] Kettle's inner lid, spout and filter are made of food-grade 304 stainless steel. No plastic contaminates water due to the BPA-free and FDA-approved Material. Advanced auto shut off and boil dry protection function ensure 100% electrical safety and save more energy than induction cooker or stove.
- [Double Wall Structure] Constructed with double walls, this electric kettle not only prevents your hands being scalded while touching, but also keeps water warm much longer. Inner stainless-steel surface is for 100% water drinking safety, exterior matte finish layer is for heat insulation and offers stylish looking.
- [Fast-Boiling & Large Capacity] With 1500 watts of power, this stainless steel electric kettle can quickly heats up water within 5-6 minutes, effectively shortening waiting time. 1.7L electric kettle can provide about 8 cups of water for your whole day drinking. Perfectly use it to make coffee, tea, milk, oatmeal, etc.

- [Easy to Clean & Store] A wide mouth is easy for cleaning and filling, allowing you to totally reach into the bottom of the stainless steel kettle to clean inside limescale. The cord can be stored into the power base when not use, and the slender body is suitable to place on counter top without occupying too much area.
- [Warm Tips] To descale your kettle, simply fill it with some vinegar and water, boil it, and let it soak for 1 hours. Finally wipe away the scale with a cloth.

Product Description

1.7L Double Wall Stainless Steel Electric Kettle

Habor is a brand passionately specializes in delivering high-end and most valuable household appliances and supplies in the market. We talk & listen to our customers and value every constructive feedback to improve our products and services.

Ergonomic Handle & 360-Degree Swivel Base

Study skidproof handle enables you to fill and pour the hot water safely, also it is convenient for you to hold the kettle while cleaning. The 360-degree swivel base is a new upgraded design that is possible for your kettle connecting to the power base at any angle.

Blue Led Light Indicator

Equipped with the blue led indicator, this electric kettle can remind you of the working status. It is on working status when the light on and it will turn off after it boiled

Easy to descale

The way of removing scale & Cleaning:

- 1. Pour a 1-to-1 solution of white vinegar and water in your kettle. Let it sit for at least 15 minutes and then heat the solution to a boil for 5 minutes.
- 2. Once boiled, let it sit for at least another 15 minutes. Afterwards, rinse out the kettle with fresh water to get rid of residual vinegar.

Great Working Kettle - would recommend

Reviewed in the United States on January 19, 2020

Write a customer review

Verified Purchase

I did a lot of research on kettles and after reading the reviews on this one, I purchased it. When I received it, I washed it out with a little soap and water before filling it and letting it boil, emptying it and then running another clean boil through it again. It works as a kettle should and I've had many cups of tea from it!

It's sturdy and the inside of the kettle hasn't tarnished or changed colour nor rusted. To clean it I suggest using vinegar and water to remove any water/limescale stains (which is normal in any kettle).

Amazon Customer

Auto shut off feature works outstandingly well!

Reviewed in the United States on March 16, 2020

Verified Purchase

Very much like that the 1.8 liter capacity is just the perfect size for filling the so-called thermos or insulated vacuum bottles (if you prefer). Still need to be careful when handling hot water, but this water kettle is so much cooler to the touch with scalding risk significantly reduced. Our water hardness in winter increases slightly, sometimes leaving a light superficial rust deposit such as the 1' x 1' one found on the pouring spout, easily scrubbed away with a Scotch Brite scrubbing pad, also found on any stainless steel surface seasonally (summertime, too). Auto shut off works like a champ. Like to pour boiling water into kitchen sinks in winter to sanitize and heat pipes as an aid to help keep pipes from freezing in case power happens to go out. Works great! Do so once an hour or so if bitterly cold. Also boil one kettle full of water, pour into good sized pot, put on lid with no vent hole or aluminum foil if necessary, put in unheated oven and close oven door. Provides very nice radiant heat for several hours, again if bitterly cold, reduces heater usage. Make sure pan lid or foil is sealed as tightly as possible or there will be condensation. Many folks using heat tape for freeze up protection in our area had frozen and burst pipes when the power went out during a sudden windy bitterly cold ice storm, but we did not have any issues like that, resulting in significant savings and convenience. If the boiled water is used right away which normally we do, there is no metallic flavor, so far.

Chris R

Great electric kettle

Reviewed in the United States on January 14, 2020

Verified Purchase

I wanted to get a kettle for french pressing coffee. I decided to go with an electric one after seeing this model. Easy to setup and get going. The kettle maintains the temperature well and the double insulation prevents burning yourself. I like the big handle. The few minor gripes would be the length of the power cord and the lid could swing open more. Other than that, I really like this product.

Never boil H2O on the stove again!

Reviewed in the United States on December 11, 2019

Verified Purchase

I absolutely love my kettle! I do not know how life existed before I found this. My husband goes through a gallon or more of tea a day and this kettle makes my life so much easier. It boils water in less than a minute!! It is so simple to clean. I would purchase again because I won't be without it now!!!

If I had to change anything about it, I wish the lid opened up a little further. Other than that it is perfect!!

Kumapi

Nice looking product, great customer service

Reviewed in the United States on March 9, 2020

Verified Purchase

Updated:

The seller has incredibly good customer service. I immediately received a new kettle, no questions asked. The new unit works perfectly so far with no issues. Thanks!

Love the design and ergonomics if the kettle, but it didn't last very long Before getting a bit whacky. Currently makes a loud popping noise every couple of seconds when water is put to boil. This started after only about 2 months of usage. Still works, but that sound is jarring and makes me feel like it's going to explode at some point.

Fast boil! Good, simple, satisfying design.

Reviewed in the United States on February 18, 2020

Verified Purchase

One of those objects that are simply a joy to use.

I love this kettle. It's fast, and sturdy. It feels good in my hands, has that kind of texture I enjoy touching.

It has a satisfying clunk when you close the lid, making a satisfying noise too.

It's sturdy, has no unnecessary windows that often leak on other kettles. It looks great too.

An example of good, simple, satisfying design. Buy it!

Nice-looking Electric Kettle

Reviewed in the United States on January 13, 2020

Verified Purchase

This is a perfect electric kettle for a family or couple. I think I'd buy it even if it was just me. It looks nice (I got the black one) and it heats very quickly. It has the standard boil-dry protection and auto shutoff. Short cord, which I prefer. Definitely would buy again and recommend.
