Description

Minsar is a no-code platform used to build, share, and collaborate on AR/VR experiences. We empower creators ranging from emerging designers to global companies, by making it easy-to create immersive 3D environments. You can now create dynamic experiences, while fully immersed in your virtual environment. You can import videos, texts, pictures, volumetric videos, 3D objects, and then place them directly in your scene, animate them, and share your experience with the world.
Minsar Studio provides a new space for creative minds to express themselves. It is fully cross-platform and currently available on Oculus Quest, Oculus Rift, HoloLens 2, Magic Leap, iOS, and Android devices.
It can be used across multiple sectors such as retail, architecture, urban planning, interior design, culture, tourism, corporate training, and more.

Minsar Studio - Go Beyond R...

What's new in this version

Minsar Studio 1.18 adds official support for HoloLens 2!
It also now lets creators import 360 images; choose between rounded and sharp corners for 2D assets such as flat images and flat videos; create scenes anchored to a horizontal or vertical surface; and brings many UX and UI improvements.
Full changelog: https://docs.minsar.app/home/changelog

Features

Anchor your scene to an image, a surface, or the environment

Import files and assets from your cloud storage (Dropbox, Google Drive) or online providers such as Sketchfab

Add engaging interactions with no-code

Publish and Share with millions of devices in just a few taps

Edit as you go, scenes are automatically saved!
