About Us

Established in 1993, Air Control is a locally-owned and operated business serving Northwest Arkansas homeowners. Our 35-member team is like a family; serving customers with honesty and integrity, and never taking advantage of your time and budget.

At Air Control, customers are our first priority. We understand it can be difficult to allow a contractor into your home, so we work hard to earn your trust and repeat business.

When it's time for your repair or system replacement, a uniformed technician arrives in a tidy, well-marked vehicle, ready to discuss your needs and provide budget-friendly options. We don't inflate equipment pricing and our technicians never work on commission. Because of this, we never encourage system replacement when only a part is needed.

All Air Control personnel are employees. We never subcontract our work, and our office staff, technicians and installers are drug tested, background checked, trained and experienced. For your protection, we are also licensed, bonded and insured.

Air Control technicians can repair and install most major brands and due to large-volume purchasing, we can save most customers an average of 37 percent on their new heating or cooling system. In addition, we honor most manufacturers' part warranties. Many of our competitors do not and this can cost you hundreds of dollars!

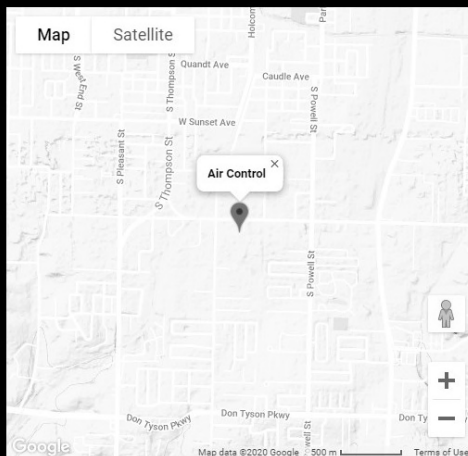

READ MORE

"I AM AN EXISTING CUSTOMER. AIR CONTROL ALWAYS TAKES CARE OF MY HVAC NEEDS WITH THEIR PROFESSIONAL, COURTEOUS AND KNOWLEDGEABLE EMPLOYEES. WILL HIGHLY RECOMMEND TO EVERYONE."

- K. Cotton

In recognition of our outstanding customer service surveys and sales, Air Control has received the prestigious Circle of Excellence award for five consecutive years. Only the top 1% of North American dealers receives this honor!
