Product information:

Superior Design: The 90 degree is good for the cords, They're square and compact and aim the USB ports up or down (depending on your outlet) instead of straight out, So don't worry about the kids used to run into the cord.

Simultaneous Charging: Dual USB output with total current 2.44/5V and input with 100-240V enables you to charge two mobile devices simultaneously at high speed, Maximum output 2.4A(Does not support Qualcomm Quick Charge).

Advanced Charging Technology: YAYUSI USB charger adapter automatically recognizes any USB-enabled device and provides the fastest and safest charging speed.

Office and Home equipment: The USB ports come out the side instead of the top so the plugged in USB cables follow the wall instead of sticking straight out, Fits cleanly behind nightstand(Narrow place) to allow it to sit closure to wall since cords run parallel with wall.
